

# HEAD RACQUETBALL COLLECTION 2019

**HEAD®**

**Penn®**

# PWRAIL

*HIGH PERFORMANCE BEAM*

**MOST POWERFUL RADICAL'S EVER  
FEATURING POWERRAIL TECHNOLOGY.**

HEAD engineers have developed a major breakthrough in high performance racquet design. PowerRAILS Technology is an all new advanced beam cross section in the throat area of the racquet. PowerRAILS dramatically increases torsional stiffness delivering unprecedented power with stunning pinpoint control.

**GRAPHENE**  
360

## **GRAPHENE 360 | AMPLIFY YOUR ENERGY**

Graphene 360 forms the structural base of the racquet, strategically positioned in the shaft and extending into the racquet head. It provides greater stability and optimized energy transfer from racquet to ball to maximize the power of your game.

# POWER NEVER FELT SO GOOD

## GRAPHENE TOUCH.

You have come to expect excellence with each generation of HEAD Graphene technology. Now experience the perfect combination of power and comfort with GRAPHENE TOUCH.

We have re-engineered the construction with the latest Graphene material and added Kraibon for improved shock absorption. This delivers unparalleled comfort without compromising the power level of Graphene.

Less shock, more wow.

## CHANGE YOUR GAME. ANYTIME.

**AFP:** Adaptive Fan Pattern technology allows you to customize your string pattern to maximize your game. With HEAD's new racquet and bumper technology, you are able to choose between the 16/16 traditional or 12/16 extreme fan pattern each time you string.

- 16/16 Traditional String Pattern is designed for players with faster swing speeds that need maximum power while increasing precision and string durability.
- 12/16 Modified Fan Pattern is designed for players with all swing speeds that are looking to maximize power. This modified fan pattern keeps the center eight mains the same as in the 16/16 pattern but eliminates four of the outer main strings. This maintains the dense pattern in the sweet spot area while still lowering swingweight and increasing string deflection delivering incredible power and soft feel on every shot.

Innegra™ is the world's lightest high performance fiber. Its extreme toughness together with HEAD's advanced carbon composite technology leads to a novel ultra-tough hybrid-composite.

The HEAD Innegra™ hybrid-composite structure is integrated into the racquet for shock absorption and improved stability. As a result, vibrations are reduced by up to 17% on ball impact for unique control and precision. This protects the player from the forces of a ball impact.

The next generation of HEAD's revolutionary Inner Grommet System Technology (IGS2) eliminates exterior grommet holes delivering optimal stiffness, but with less weight.

HEAD takes Power Channels to the next level! This power technology is created through molded tubes in the throat, eliminating exterior string holes and the traditional grommet system. This lengthens each main string and creates maximum stiffness which results in an incredible increase in raw power.

HEAD's patented twin tube construction is strategically placed in the head of the racquet to provide maximum stability. This ensures incredible power even on off-center shots.

HEAD's new ComforTech™ Grip Technology incorporates a specially formulated PU material into the racquet handle. This creates a softer grip and dampens vibrations for the ultimate in comfort and playability.

Metallix is one of the lightest and strongest alloy materials today. This alloy's grain size is 1000 times smaller than those of a typical metal, and by decreasing grain size, performance is increased. HEAD Metallix allows for a stronger, stiffer, more powerful construction.

**Delta Frame:** A new optimized frame shape with constant beam width allows for the largest sweetspot possible that is high on the string bed, and incredible power and feel.

**DFS (Dynamic Frame Shape):** DFS increases racquet maneuverability and creates a larger sweetspot, and a faster swing for more power.

**V-PORTS:** V-PORTS are new channels in the throat of the racquet creating longer main strings for substantial increase in power. The frame is solid in the throat area for increased stiffness, and better power and feel.

**H-Beam:** H-Beam is a hexagonal frame shape that increases racquet stiffness and stability, creating maximum power, feel, and sweetspot.

**Dynamic PowerZone String Pattern:** HEAD's innovative string pattern just got better with even longer main strings and reduced cross strings to create the most power possible!

**Damp Plus:** Damp Plus absorbs impact vibration before it can reach the handle for better feel.

## EXTREME 155

At just 155 grams, the Extreme 155 has been upgraded to feature HEAD's revolutionary Graphene Touch Technology. Effortless raw power with extreme comfort offers competitive players the most technologically advanced racquet in the world! For maximum power, utilize HEAD's Adaptive String Pattern to re-string the frame with 12 main strings instead of the standard 16 and prepare to feel the BOOM!

## HEAD FOOTWEAR TECHNOLOGIES

### HEAD Energy Frame

Inspired by our ski boots, the side wings guarantee the best stability when moving side to side. These stability elements have been specifically designed and developed for sports where lateral support is extremely important. This technology is a key element in all our stability

### LATERAL CONTROL

### HEAD Lateral Control

HEAD includes additional lateral stability in all our top performance shoes to help avoid rolling over.

### DRIFT DEFENSE

### HEAD Drift Defense

In order to have a complete indoor shoe, the upper needs to be durable, especially around the toe and medial forefoot area. HEAD uses an abrasion resistant rubber or a TPU layer in the Drift Defense technology to protect this area.

### COOLING SYSTEM

### HEAD Cooling System

Perforations in the outsole, midsole and sockliner ensure great ventilation in the bottom of the shoe. It also includes a breathable upper mesh material that provides optimal cooling.

### HYBRASION+

### HEAD Hybrasion+

A special rubber compound developed for indoor shoes. Guarantees the best traction for all court surfaces while still providing excellent durability.

## REVOLT INDOOR

The HEAD Revolt Indoor is a premium performance indoor shoe that combines the often-opposing optimum combination of comfort and stability for the most secure feel.

### UPPER

Durable synthetic leather materials  
Breathable lining and upper mesh materials  
Drift Defense medial protection  
Energy Frame TPU heel stabilizer

### ALLCOURT

Hybrid outsole Profile optimized for different indoor surfaces  
HEAD HYBRASION non-marking gum-rubber.
